PROFESSIONAL SUMMARY

Results-driven Web & Full Stack Developer with hands-on industry experience in building scalable web applications using the MERN stack. Currently working as a Web-App Developer Intern at an EdTech platform (Crispr Learning), where I also developed strong skills in video editing and graphic design for digital learning content. Passionate about clean UI/UX, performance optimization, and continuous learning.

TECHNICAL SKILLS

Frontend: React.js, Next.js, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js

Database: MongoDB

Languages: JavaScript, TypeScript

Authentication & APIs: JWT, REST APIs, Context API

Tools: Git, GitHub, VS Code, Postman

Creative Skills: Video Editing, Graphic Designing (Premiere Pro, Photoshop etc)

EXPERIENCE

Web-App Developer Intern — Crispr Learning (EdTech Platform)

June 2024 – Present

- Developed and maintained web application features for an EdTech platform.
- Collaborated with designers and educators to improve UI/UX of learning modules.
- Created and edited educational videos and promotional content.
- Gained real-world experience working in a fast-paced product-based environment.

MERN Stack Web Developer Intern — Soften Technologies, Kochi

May 2024 – Oct 2024

- Built full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Developed secure RESTful APIs with JWT-based authentication.
- Integrated MongoDB Atlas for scalable data storage.
- Worked in Agile teams, participated in daily scrums and code reviews.

PROJECTS

E-Commerce Web Application (MERN Stack)

- Built a complete e-commerce platform with User, Seller, and Admin roles.
- Implemented cart, wishlist, authentication, and product management.

- Used Context API and React Router for state management and navigation.

GitHub: <https://github.com/Hashim333/mernecommerce>

Todo Application

- Created a dynamic Todo app with add, edit, delete, and state management features.
- Focused on clean UI, reusable components, and React best practices.

Blood Bank Application (Academic Project)

- Developed a system for blood donor registration and seeker search.
- Included admin dashboard for managing donors and inventory.

Technologies: Python, Android, SQL, Bootstrap, Material UI

PORTFOLIO

A personal portfolio website showcasing all projects, skills, and creative works.
